SUMMARY

Front-end Engineer with a background in media arts. Combining that skillset with web development to build creative web applications while also ensuring an intuitive user experience. Recently earned a certificate in full stack development from the University of California Berkeley, with extensive hands-on experience in JavaScript, CSS, React.js, and responsive web design. Strengths in design and technical problem solving has translated into being proficient in front-end development, especially with react.js. While thriving in a fast-paced, collaborative environment; the aim is to internalize the user and promote good usability and accessibility in every experience.

TECHNICAL SKILLS.

Languages: HTML, CSS, Javascript, express.js, node.js, noSQL, react.js, typescript, JSON, Babel, Redux, webpack
Applications: Adobe Creative Suite, Git Hub/Lab, VS code, chrome dev tools, google suite, Jira, Atlassian, Confluence

PROJECTS

Monstera | github.com/down-dive/monstera | monstera2.herokuapp.com/
This web application is to help prevent domestic violence. It allows users to login and discuss the issues that they are facing.
- Collaborate with a team of 4 hardworking developers to design, develop, debug and deploy the web application using agile methodology.
- Role: Designed the user interface creating prototypes and mockups.Developed client-side scripting for all front-end web development
- Documented all code changes in Github and built reusable code and libraries
- Tools: React.js, Javascript, CSS, material-UI, node.js

Swap Meet | github.com/kingkevin05/swap-meet | serene-brushlands-34437.herokuapp.com
Swap Meet was created to help others meet, sell, and trade their possessions.
- Participated on a team of developers to work across the stack, specifically with express, MySQL, and sequelize.
- Role: Connecting the front-end and back-end. Helped write schemas and apply API. Took on all the debugging and maintenance. Wrote code for unit testing with Jest
- Led and presented a product demonstration for a group of 55 developers for a peer review
- Tools:Handelbars.js, MySQL, javascript, express, sequelize

Weather-or-Not | github.com/kingkevin05/weather-or-not | kingkevin05.github.io/weather-or-not/
Weather-or-Not enables users to find fun events and activities in a given city depending on the weather.
- Role: Utilized 3 different APIs to retrieve appropriate data for the weather app.
- Contributed ideas and experiences to help the team implement web standards, cross-browser compatibility, and accessibility
- Provided subject matter expertise for web and mobile web responsive designs
- Tools: HTML, CSS, javascript

Delivery/Consultant   11/2021 - Current
Apothecarium   San Francisco, CA
Drive and deliver products from The Apothecarium to customers in our delivery territory.
- Provide excellent customer service.
- Ensure accurate cash handling, and register management
